PROFESSIONAL SUMMARY

AI Deployment Strategist, I help companies turn AI into concrete results. As Wesype's first employee (now ~40 people), I support companies from the identification of high-ROI use cases through to the deployment of AI agents connected to their own data and business tools. With a dual background in business and software engineering, I cover both the technical build and the client relationship and follow-up.

STACK

AI & automation: Dust, Claude, AI agents, prompt engineering, MCP integrations, n8n, Make, Zapier

Development: JavaScript, Python, Node.js, REST APIs, Docker, SQLite/MariaDB, Redis, Git/GitHub, C, C++, UNIX

LANGUAGES

French: Native

English: Advanced (C1)

EXPERIENCE

2025 - Present - Wesype - Full-time - AI Deployment Strategist - Paris

- First employee at Wesype: contributed to structuring the company, now ~40 people
- Diagnosis & mapping of high-ROI AI use cases for SMEs and mid-market companies
- Design of the AI roadmap & project governance
- Deployment of AI agents on Dust: custom agents connected to client data and business tools
- Training sessions, hackathons & team upskilling
- Ongoing technical support & change management
- Industries served: tech · consulting · financial services (PE/VC) · legal · real estate

2023 - 2025 - Software projects at 42 Paris

- Complete projects delivered in teams: Node.js / SQLite backend, REST APIs, Docker containerisation, systems programming in C
- Agile setup: scoping, prioritisation and regular code reviews in a team
- Technical foundation (architectures, APIs, integrations) now used to design and deploy AI agents connected to business tools

2022 – 2023 – Hôtel Plaza Athénée Paris (Palace) – Full-time – Assistant Credit Manager
